## A Historical Legacy, A Brand – Harrison

India a nation known for its spirit of pride and self-reliance. This very spirit is deeply rooted in our Swadeshi movement, which taught us the importance of **staying connected to our roots and taking pride in products made in our own country**. Among the names that truly embody this ethos, one stands tall Harrison a brand that has been serving the nation since 1949, right after India's independence, by crafting indigenous locks.

### This is the story of Harrison.

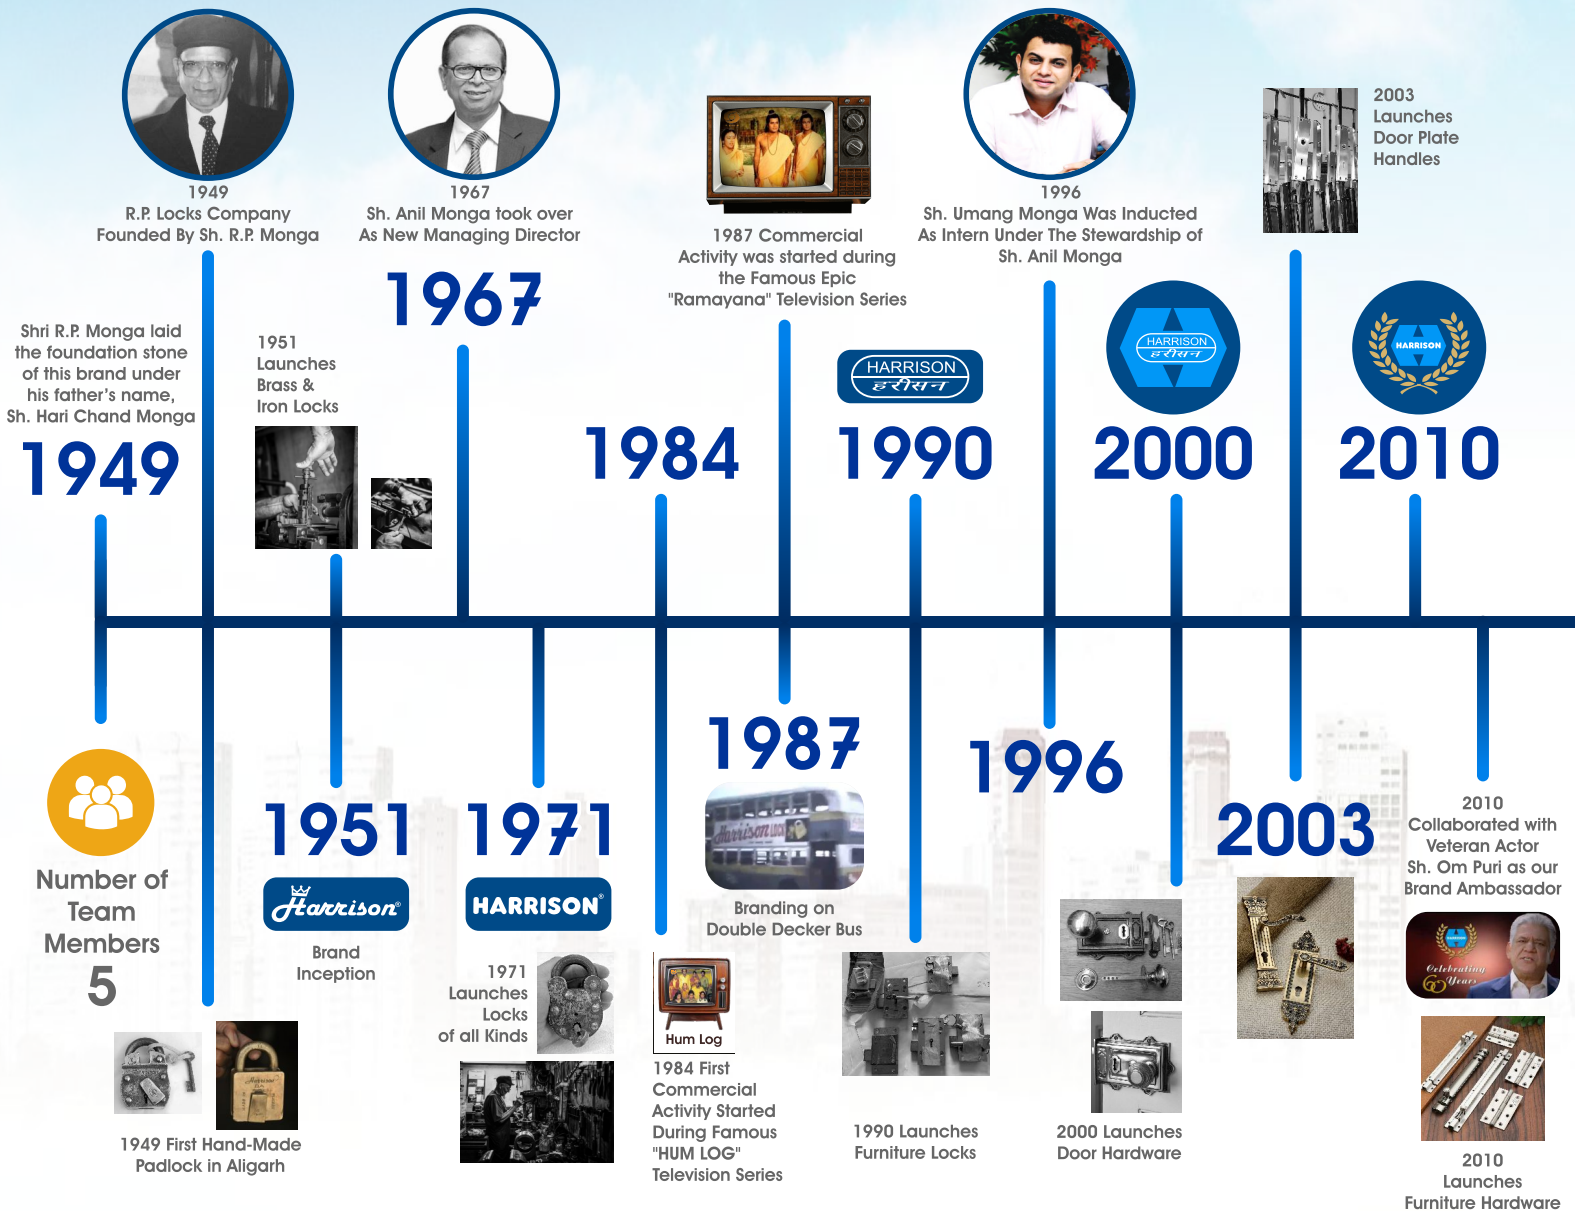

For over 75 years, Harrison has not merely been manufacturing locks it has been building trust in every Indian household. When the nation was finding its footing, Harrison recognized the value of homegrown products and began producing locks that symbolized both strength and self-reliance. Over the decades, Harrison has not only upheld its legacy of quality and durability but has also proven that Indian brands can indeed stand shoulder to shoulder with the best in the world.

Harrison locks are not just pieces of metal; **they are part of a historic heritage** symbols of faith and security passed down through generations. Every lock carries the essence of national pride, reminding us that **when we choose Swadeshi products, we aren't just making a purchase we're contributing to the growth and self-reliance of our nation**.

Even today, **Harrison continues to manufacture locks and security solutions with the same passion and dedication that inspired its founding in 1949**. So, when you choose a Harrison lock, you're not just securing your home you're preserving a historical legacy and becoming a part of a brand's enduring story.
